

Dear Afton Marina & Yacht Club Boaters:

Once again we are coming to the end of another boating season at Afton Marina & Yacht Club. I would like to thank all of our customers who used our service department this year. The time has again come to schedule laying up your boat for the off-season. Our first week of haul-out will begin Monday, September 20, 2020 and we plan weather permitting to have all boats out of the water by the November 1st. This year we will be offering a 5% discount for boaters who would like to have their boat hauled out and winterized before September 20th.

Enclosed you will find our Request for Winterization form and a list of charges associated with winterization. As in previous years, the service department will be scheduling haul-out on a per week basis. **Your boat will be winterized, hauled-out and blocked within a scheduled week, not on a specific date.** Please note that our winterization schedule is dictated by the order in which we receive your request form. If you wish to keep your boat in the water until late October it is essential that you return your winterization request sheet at your earliest convenience. The winterization schedule for the last two weeks of October typically fills up very quickly. **Please note: October 29, 2010 is the last day of haul-out. An additional \$100.00 winterization fee will be incurred if you have not scheduled the winterization of your boat by the end of October.** Winterization requests received after a week has been fully scheduled will be moved to either the prior or following week, depending upon our service schedule. **Please note: your boat must be ready for haul-out on the Monday morning of the scheduled week.** In the case that your boat is not ready for winterization when scheduled, we will winterize your boat as our schedule allows. Please remember that you are responsible for scheduling the winterization and haul-out of your boat. You will be notified if the marina cannot winterize your boat during your requested week and be given the opportunity to reschedule. **The marina is not responsible for any damage associated with cold weather prior to winterization.**

The marina is now requiring that a valid credit card be kept on file before your boat may be winterized or hauled-out. If the marina does not currently have your credit card on file, you will be contacted for credit card information following submission of your winterization request form. Winterization charges will automatically be billed to credit cards if payment is not received within 30 days of invoiced charges. You may also use your credit card for payment if you choose.

It's a big time saver for our service crew if you can run your water tank dry the last time you are on the boat. It's also greatly appreciated if you can remove your camper tops and clear vinyl windows for shrink-wrapping. If you pump your waste holding tank, please leave a note on the steering wheel. If no note is found stating that the boat has been pumped out, we will assume that a pumpout is needed and you will be charged. Please note: while the service crew takes every precaution to handle your boat gently and safely, some abnormal movement will occur while your boat is hauled out. Please take a quick minute to secure all items throughout the boat that may fall, tip over, or move. **The marina is not responsible for any damage or breakage that may result from unsecured items.**

Winterization of your boat by the marina's service department includes draining the water from all engines (where applicable), checking the quality of engine antifreeze (closed-cooled engines), and checking the stern drive for the presence of water in the lubricant (inboard/outboard and outboard). The water system will have non-toxic pink antifreeze pumped through the entire system, including faucets, icemakers, etc. Each toilet will be flushed until dry and have one gallon of non-toxic antifreeze pumped through the system. Your boat will be pulled out of the water and pressure washed **IF REQUESTED**. Then it will be carefully and safely blocked for off-season storage. The service department does not change the engine oil at the time of haul-out. Please contact me if you would like to have your oil changed when we pull the boat for the season.

The marina will again be offering shrink-wrap services. If you have not used our shrink-wrap service previously, please review our prices and consider supporting the marina. Please remember that using the marina to shrink wrap your boat assures that your boat will be protected throughout the off season. Marina employees inspect the condition of boat wrap daily thus preventing any damage that could be caused by excessive snowfall or high winds. In the instance that we receive a large snowfall, marina employees sweep off the boats that are holding a snow load. In addition, your boat is usually wrapped on the same day as it is hauled-out. We even carefully remove your boat's canvas in the fall and re-install it in the spring at no additional charge. Your boat will also be washed when launched if it is wrapped by the marina. **Please note: the marina will not provide any warranty for shrinkwrap that has been modified by the customer, including installation of zippered access doors.** Please indicate if you want the marina to wrap your boat on the enclosed winterization request form.

Haul-out is a very busy time for the service department. Our focus is getting the boats safely put away for the off-season. We do not schedule service work while we are winterizing, hoisting and blocking boats. Any service work that you would like us to perform should be scheduled prior to the beginning of haul-out or after haul-out has ended. I would invite you to review the enclosed sheet listing our off-season specials. The off-season is a great opportunity to have the service department perform those repairs that you put off during the boating season. Please return your enclosed Request for Winterization at your earliest convenience.

Thank you,

Brian Schroeder
